Overview

Get it off! Is the next stage in the evolution of the It’s NOT Mine! Body cum system! This addition to the cum system continues with the idea that not only is there some effort required to becoming a hot sticky mess, but that there is also some effort required to undo such a mess.

While the It’s NOT Mine system requires you to wash off the mess once it is on you, that may not always be convenient or appropriate for the RP or situation you are currently engaged in.

Get it off! provides you with the ability to invoke another option, one that again may be well within your means, if you found yourself in such a situation in that place known as real life. The ability to ‘wipe’ it off with a rag or towel.

The Get it off! System consists of a wash machine and 5 re-usable towels.

The wash machine needs to be rezzed in world, and really is the heart of this system. Without it, the towels will never work! The wash machine is used to clean the towels so that they can be used, and re-used once they have reached the number of uses that are allowed after each wash.

The towels are worn items. Meaning they attach to you, are present in your inventory, and that you can use them pretty much anywhere! Each time one of the towels are used, they will remove one (1) layer of cum from the area you specify, up to its number of allowed uses per wash. After that, for a few times anyway, since the towel is now considered to be ‘dirty’ it will actually make the mess bigger. The towels can be used to clean up yourself, or anyone else using the It’s NOT Mine! system.
What’s Included

- **5 re-usable towels**
  - Towels come with Modify and Transfer permissions
  - Partial Mesh construction

- **1 wash machine**
  - The wash machine comes with Copy and Modify permissions
  - Constructed primarily in mesh
  - Singles and Couples animations so you can get off while your towels are washing!
Using the Wash Machine

The wash machine has been designed to be as easy to use, and as intuitive as possible within the confines of Second Life®

Wash Machine Controls

Display Unit

Control Knob

Wash Drum

Door

Clean Towels
Using the Wash Machine

Before you can use the washing machine, it must be rezzed in world!

You must have land, or access to land, with at least 15 LI available where you can rez the wash machine!

I cannot be responsible for lost items due to the inability to rez or the region you are in being too full!

Loading the wash machine

Towels can ONLY be loaded while the wash machine is in the ‘Ready’ state!

1. Open the door on the wash machine (The display will change to indicate the door is open).
2. Locate the towels that come with the Get it off! system, in your inventory.
3. Left mouse click ONE (1) of the towels and continue to hold the left mouse button down.
4. Press and Hold the Ctrl key on your keyboard.
5. Drag the towel from your inventory to the Wash drum area of the wash machine. (When done correctly, the entire wash machine will highlight in red)
6. Release the Left mouse button.
7. Release the Ctrl key on your keyboard.
8. Repeat steps 3 through 7 for the remaining towels you want to wash. (You do not have to wash all 5 towels each time, but you cannot wash towels with duplicate names. ie: Towel 1 and Towel 1)

The order of steps 6 and 7 is critical! They MUST be performed in the correct order or the machine will not load!
Using the Wash Machine

Loading the wash machine

If you did everything correctly, the 5 towels you loaded should no longer be present in your inventory. They should appear to be in the wash machine!

Go ahead and close the door on the wash machine.

Adjusting the number of uses a towel is good for

This setting can only be adjusted while the wash machine is in the ‘Ready’ state, as indicated by the display unit!

To adjust the number of uses the wash cycle will make a towel good for before it is considered to be ‘dirty’, simply click the Display Unit on the wash machine.

The number of uses will be shown on the display as a number between 1 and 12, indicating how many times the towels can be used after they are washed.
Start the Wash Cycle

Once you have the wash machine loaded, the number of uses set, and the door closed, press the Control Knob on the washer to begin the wash cycle.

If you open the wash machine door or press the control knob after the wash cycle has begun, the cycle will pause until either the door is closed again or you press the control knob again!

The wash cycle takes approximately 28 minutes to complete if it goes uninterrupted. You do not have to wait by the washer during the wash cycle. Feel free to go about your business just like you normally would!

Taking the towels out of the wash machine

Make sure you have at least 1 free attachment point before you begin!!

To get the towels out of the wash machine, and back into your inventory once the wash cycle is complete:

1. Open the wash machine door
2. Click on one of the towels inside the wash machine
3. Accept the towels request to attach to your avatar.
4. Detach the towel from your hand
5. Repeat steps 2 through 4 for the remaining towels in the wash machine.

Once all of the towels are removed, the wash machine will return to the ‘Ready’ state and you should have them back in your inventory again!
The towels are incredibly simple to use!

1. Locate one of the towels within your inventory and attach it
2. Click on the towel after it is worn to access its menu. The towel will do a quick scan to determine if there is anyone nearby that it may be able to be used on. The menu that appears will list anyone nearby.

3. Once you make a selection, the towel will request information from that person’s It’s NOT Mine! System. If that person is using the It’s NOT Mine! system and it is version 2.2 or higher, you should see this menu appear. (Left & right arms and legs options will only appear in the menu if the user has the Arms & Legs add-on!)

The menu will tell you:
- How many uses the towel has left
- The current levels of cum on each area of the person selected.

4. Choosing an area to use the towel on will remove one cum layer from the person selected and remove one use from the towel.

If you do not see the cum levels displayed, you should NOT use the towel on the person selected!

Using the towel on someone with an older version of It’s NOT Mine!, that the towel cannot determine the cum levels of, will cause cum to appear in your mouth!
The wash machine has 4 single female sits and 12 couples sex animations built into it.

It is also using the AVsitter2 pose engine, so there are no poseballs!

Simply sit on the wash machine then click on it for the pose menu. As with all of my products, the female always sits first, then the male.

Both singles and couples animations can be used whether the wash machine is running or not, so you can get off while you’re waiting to get it off! :)}
Do’s & Don’ts

- **Do not** delete the washing machine while there are towels inside it or during the wash cycle!! (Your towels will get deleted too!)
- **Do not** pick up the washing machine while there are towels inside it or during the wash cycle!!
- **Do not** try to put anything except the towels that come with the system, or replacement towels, into the wash machine!!
- **Do not** try to add multiple towels with the same name to the wash machine!! ie: Towel 1 and Towel 1
- **Do not** resize the wash machine!! Doing so will cause the drum, water prim, and animations to become misaligned
- **Do not** try to add dirty towels until all the clean towels are removed and the washer has returned to its ‘Ready’ state. (The wash machine state will be indicated on the Display Unit while the door is closed, opening the door does not change its state!)
- **Do not** forget to set the number of uses the towels are good for **BEFORE** washing them!
- **Do not** rez a clean towel on the floor unless you want to wash it again before it can be used!

- **Do** make sure you have land, or access to land, with at least 15LI available where you can rez the wash machine
- **Do** make sure that you have at least 1 free attachment point before trying to remove the towels from the wash machine
- **Do** enjoy the system!
  - The towels are transfer and can be given away for others to use on you (Though they will have to give them back to you in order to be washed again!)
  - Remember dirty towels can make more of a mess than they clean up!
