---

Special thanks to Tiffany Starlight for all of her help revising this manual!
Introduction

First off, I want to thank you for your purchase, and welcome you to the It’s NOT Mine! Family!

The It’s NOT Mine! / It’s NOT ALL Mine! Systems are the best selling, most advanced, personal cum accessories in Second Life®.

Nothing else even comes close!

Yes, I know. Others make these same claims about products that may seem similar, but the proof is in the pudding as they say. It’s NOT Mine! has the numbers to prove it.

In the nearly 3 years since It’s NOT Mine! was released to the public, it has held a top position on Marketplace’s Best Selling Items list and has racked up a combined total of 50,000 male and female users across the grid!

So, what makes It’s NOT Mine! so special?

Well, for starters, the It’s NOT Mine! System is a single, rigged/fitted mesh attachment. This means it has the ability to cover your face, neck, chest, stomach, crotch, back, and butt while only taking up one attachment point. Depending on which version of the system you have, arms, legs, hands, and feet may be included as well. The It’s NOT Mine! system is also designed and intended to be worn all the time.

That may not sound all that special, but this is where the fun begins!

When used as intended, you (the wearer) do not get to control where the mess goes on your body or how much of it is visible!

Normally, the It’s NOT Mine! system is completely transparent. No one can see it, and there is no cum visible on your body; but, the It’s NOT Mine! system sees everyone around you. So, let’s say someone with a compatible genital product is very close to you and causes their genital item to orgasm. That person, who just ejaculated, will get a menu from your It’s NOT Mine! system asking them where the mess should go….on you!

Once they make a selection from the menu, the It’s NOT Mine! system will display their mess on the selected area of your body. The resulting mess will become bigger each time an area is selected. If you have RLV enabled in your viewer, the It’s NOT Mine! system will become locked and you will not be able to detach the system or make the cum go away without a little bit of work.

That’s right! Just like in that other world, you’ll need to take a shower, jump in some Second Life® system water, or find a towel or something else to clean the mess off with!

Well, I guess you could always find someone to lick you clean too... =)
What’s Included

**It’s NOT Mine!** Body Cum System Attachment (Female system only)

- Slink Physique
- Slink Hourglass
- Maitreya Lara
- Maitreya Lara Petite *(Premium/Complete)*
- Absolute Creation Eve Curvy
- Absolute Creation Eve Slim
- Tonic Curvy
- Tonic Fine
- Belleza Freya
- TMP Deluxe/Meshbody Classic
- Belleza Venus
- Belleza Isis
- Altamura Sofia *(Premium/Complete)*
- eBody Curvy *(Premium/Complete)*
- Meshbody Legacy *(Premium/Complete)*
- Meshbody Legacy Perky *(Premium/Complete)*

Product Features

It's NOT Mine! Body Cum System Attachment

Functionality

- Realtime Statistics monitoring for times cummed on and donors.  
  *(Premium and Complete versions only)*
- Detailed, private, browser based viewing of your personal statistics.  
  *(Premium and Complete versions only)*
- Statistics monitoring can be enabled or disabled, and all personal statistical data can be deleted through the system settings menu.  
  *(Premium and Complete versions only)*
- RLV Enabled, but RLV is not required for the product to function.
- Ability to lick yourself or another INM! user.
- Cum in mouth can be swallowed, spit onto someone else, dribbled onto yourself, or swapped with another INM! user.
- Up to 4 vaginal cum drips (Female only)
- Up to 4 anal cum drips (Male version)  
  *(INM! Complete or Arms & Legs add-on required for single Female anal drip)*
- Multiple methods to get cleaned up.
- Ability to change the visible appearance of cum.  
  *(Color, transparency, glass, texture animation)*
- Actively maintained and updates are free for the life of the product.

Interaction and Integration

- Monitors orgasms from dozens of the most popular genital products in Second Life® *(Functionality verified with over 50 different genital products!)*
- Compatible with Spunklovers Supplier HUD.
- Interacts with all variants of It’s NOT Mine! Systems.  
  *(Functions may be limited when interacting with non-current INM! systems)*
- Integrates with Deciduan Couples HUD for vaginal drips. *(Female only)*
- Integrates with PsiCorp Fertility System for vagina drips. *(Female only)*
- Integrates with Xcite! Brand Genitals for arousal stimulation.
- Integrates with Caerl’s Project Arousal for arousal stimulation.
- Integrates with 100’s of furniture items in Second Life® to automatically apply mess to most appropriate spot for the pose currently in use.

Construction and Fitment

- 100% original rigged/fitted mesh.
- Fits 25+ of the most popular male and female mesh bodies in SL®
- Multiple face options to fit most mesh heads in Second Life®
- No appliers and no tattoo or clothing layers to mess with.
- Only takes up one attachment slot. *(Additional attachment points required for add-ons)*
- Materials enabled, animated textures
- Bento animations
Product Features

It’s NOT Mine! Showers

Features

- Copy and Mod OK
- Powered by Avsitter2
- Bento Animations
- 3 different showers to choose from. 5 to 7 LI depending on the shower.
- Separate shower base in either Left or Right orientation can be used with any shower. 3 LI
- Adjustable cleanup time for each cleanup pose
Getting Started

First things First!

- If purchased in world, unpack your It’s NOT Mine! Body Cum System by attaching the gift bag.
  Skip this step if you made your purchase on Marketplace.

- Locate the It’s NOT Mine folder in your inventory
  If purchased on Marketplace, it will be in your Received Items folder; otherwise you will find it in the main part of your inventory.

- Activate all of the gestures that came with your It’s NOT Mine! System.
  If purchased on Marketplace, these will be in a folder named “Gestures”, within the It’s NOT Mine! folder.
  Right click each gesture inside your inventory and choose ‘Activate’ from the menu that appears.

- Rez one of the showers, included with your It’s NOT Mine! system, at your home.
  If purchased on Marketplace, the showers will be in a folder named “Showers”, within the It’s NOT Mine! folder.
  Do not worry if you do not have a home or some location where you can rez a shower. There is a list of public sims, which have showers you can use, near the end of this document.

- Find and attach the It’s NOT Mine! Body Cum System attachment for your mesh body.
  If purchased on Marketplace, the body cum system attachments will be in folders named for the brand of the body, inside the It’s NOT Mine! folder.

- Click the ‘Go to page’ button in the dialog box to access the online User Manual.

- Follow along to set your user preferences and learn how to use your It’s NOT Mine! system.
Getting Started

General Options Menu

There are several ways to access the General Options menu of your It's NOT Mine! system.

- With the “Cum Menu” gesture activated, simply press the key combination Ctrl+Enter on your Windows keyboard
- Type “/33 menu” into local chat. (without quotes)
- Attach the optional It's NOT Mine! User HUD, click on the HUD, and select ‘INM Menu’.
- Touch the It’s NOT Mine! Body Cum System attachment from within your inventory.
  - Find, in your inventory, the It’s NOT Mine! Body Cum System attachment you are wearing.
  - Right click on the It’s NOT Mine! attachment and Select ’Touch’ from the menu that appears. (Note that not all viewers support touching from inventory)

The General Options Menu provides access to the following key features of the It’s NOT Mine! system:

- Provides a way to give the Cum menu to someone who does not have a compatible genital product.
- Provides a way to Lick, Swallow, and Spit out cum that may be in your mouth.
- Provides a way of Wiping cum off of your face. (Complete / Premium version with arms/legs add-on)
- Provides access to the systems settings or system status.
- Provides access to your personal statistics.
- Provides an easy way to access this manual.
## Getting Started

### General Options Menu (Cont.)

Once you have gained access to the General Options menu, depending on the state of your It’s NOT Mine! system, you will find some combination of the following options:

Some options are only available in the **Complete** and **Premium** versions of It’s NOT Mine!

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Give Menu</strong></td>
<td>This option will allow you to choose someone nearby to give the Cum Menu to, in the event that they do not have a supported genital product, or any other reason of your choosing.</td>
</tr>
<tr>
<td><strong>My Stats</strong></td>
<td>Depending on your version of It’s NOT Mine! system, this option will either output your stats in local chat as a private message, along with a link to your personal stats webpage <strong>OR</strong> provide a dialog box with your stats listed and a button to go to your stats webpage. This option is only available in the <strong>Complete</strong> and <strong>Premium</strong> version of the system and only if Stat tracking is enabled in the system.</td>
</tr>
<tr>
<td><strong>User Manual</strong></td>
<td>Opens a dialog box offering to open this manual in your web browser.</td>
</tr>
<tr>
<td><strong>Cum Settings</strong></td>
<td>Provides access to the It’s NOT Mine! system settings. Note that this option is only available when you are clean and the system has not been put into SystemLock.</td>
</tr>
<tr>
<td><strong>Status</strong></td>
<td>This option will output information about how many layers of cum are currently visible on the different parts of your body, the total number visible, and the number of layers required to be visible when in Hard Mode. This option is only available when you have at least 1 cum layer visible.</td>
</tr>
<tr>
<td><strong>Wipe Face</strong></td>
<td>This option becomes available in the <strong>Complete</strong>, and <strong>Premium</strong> versions of the system if the Arms &amp; Legs Add-on is used, when you have cum on your face and a limited amount of cum on your hands/arms. Selecting this option will cause you to use one of your hands to wipe 1 layer of cum off of your face. This option is not available in the <strong>Lite</strong> version or when face option ‘None’ is used.</td>
</tr>
<tr>
<td><strong>Lick Cum</strong></td>
<td>This option will allow you to choose someone nearby to lick cum from. This option is only available when you do not have cum in your mouth, and is dependent on the other person having an It’s NOT Mine! system. This option is not available when face option ‘None’ is used.</td>
</tr>
<tr>
<td><strong>Spit</strong></td>
<td>This option will allow you to spit out any cum you have in your mouth. If another It’s NOT Mine! user is close enough to you at the time, you will be able to spit the cum from your mouth onto them. This option is not available when face option ‘None’ is used.</td>
</tr>
<tr>
<td><strong>Swallow</strong></td>
<td>This option will allow you to swallow the cum that is in your mouth. If Stat tracking is enabled, your personal statistics will be updated. This option is not available when face option ‘None’ is used.</td>
</tr>
<tr>
<td><strong>Dribble</strong></td>
<td>This option will allow you to dribble any cum that is in your mouth onto your chest. This option is not available in the <strong>Lite</strong> version or when face option ‘None’ is used.</td>
</tr>
</tbody>
</table>
Getting Started

General Options Menu (Cont.)

It is important to note that the General Options menu is a dynamic menu.

What this means is that the buttons you see in the menu will vary depending on the status of your It’s NOT Mine! system, and that some options will not always be available.

The most notable option that becomes unavailable is the ‘Cum Settings’ option. This option is only available to you when your It’s NOT Mine! system is clean and you have not been locked out of the system by another device (SystemLock)! Yes, it’s something new!

The images below display a few of the menu variations.

Top Left: System user is clean and no cum is visible on their body.

Top Right: System user has at least 1 visible cum spot but there is no cum in their mouth. They may have cum on their face, but are unable to wipe it off.

Bottom Left: System user has cum in their mouth. They may also have cum on their face, but are unable to wipe it off.

Bottom Right: System user has no cum in their mouth. They do however have cum on their face and are allowed to wipe it off.
Getting Started

Cum Settings Menu

(If you are unsure about how to get to this menu, please refer to the General Options Menu section!)

The Cum settings Menu provides access to settings related to the functionality, appearance, and privacy of your It’s NOT Mine! system.

There are some important things to remember when accessing the Cum Settings Menu:

- The Cum settings menu can only be accessed while your INM/INAM system is clean and has not been put into SystemLock by another device.
- Your INM/INAM system will be disabled when you enter the Settings menu. Additionally, all of the cum layers in the system will become visible as well as a vaginal and anal drip.
- You should never use the ‘Ignore’ button at the bottom of the menu as a method of closing the menu. Doing so will cause your INM/INAM system to remain disabled, with all of the cum layers visible until the menu times out! (Approximately 3 minutes)
- Buttons with a filled dot (●) indicate that the option is turned on, while an unfilled dot (○) indicates that the option is turned off.

What the buttons do:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Active</td>
<td>Turns the system on or off.</td>
</tr>
<tr>
<td>Detachable</td>
<td>When active, this setting allows the removal of your INM/INAM system when you are clean. Deactivating this option will lock the system on until it is re-activated.</td>
</tr>
<tr>
<td>&quot;Anal Adjust&quot;, &quot;Appearance&quot;, &quot;Functions&quot;, &quot;Faces&quot;, &quot;Privacy&quot;</td>
<td>Opens the respective sub menu, which will provide further options related to adjustment of the anal drip prim, cum appearance, system functions, face fitment, and privacy. Anal Adjust is available in the Female, Complete version only.</td>
</tr>
<tr>
<td>[Exit]</td>
<td>Exits the Cum Settings menu, re-enables system operation (If Active setting is On), and hides all of the cum layers again.</td>
</tr>
<tr>
<td>[Reset]</td>
<td>Resets all of the It’s NOT Mine! scripts in the system and restores all of the default settings. This will NOT reset your stats!!</td>
</tr>
</tbody>
</table>
Getting Started

Appearance Menu

(If you are unsure about how to get to this menu, please refer to the Cum Settings Menu section!)

The Appearance menu provides options related to the appearance of the cum layers when they become visible.

What the buttons do:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Glow</td>
<td>Gives the cum a slight glow when it becomes visible.</td>
</tr>
<tr>
<td>Cum Anim</td>
<td>Enables texture animations on the visible cum layers, giving it the feeling of slowly ‘flowing’ over your body. This setting also helps ensure things always look slightly different when layers become visible, so its not always the same old, same old!</td>
</tr>
<tr>
<td>Trans +/Trans -</td>
<td>Adjusts the opacity of the cum when it becomes visible.</td>
</tr>
<tr>
<td>Glossy +/-</td>
<td>Adjusts the shininess of the cum layers when they become visible. This setting helps with the ‘wet’ look. Advanced Lighting must be enabled in your viewer to see the effects of this setting.</td>
</tr>
<tr>
<td>Environment +/-</td>
<td>Adjust how much effect lights around you will affect the Glossy setting of the cum layers. Advanced Lighting must be enabled in your viewer to see the effects of this setting.</td>
</tr>
<tr>
<td>[Back]</td>
<td>Returns to the Cum Settings menu</td>
</tr>
<tr>
<td>[Exit]</td>
<td>Exits the Appearance and Cum Settings menu. Cum system will be re-activated and all visible cum layers are hidden.</td>
</tr>
</tbody>
</table>
Getting Started

Faces Menu

(If you are unsure about how to get to this menu, please refer to the Cum Settings Menu section.)

The Faces menu provides options related to facial animations and the fitment of your INM/INAM system to your particular head.

Please note that none of the options listed are the 'Be all, End all' when it comes to fitment! The heads listed are nothing more than suggestions.

There are very few mesh dev kits for heads in SL®, and even if they were widely available, it would be impossible to make something that fit all of the different heads currently available.

What the buttons do:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Face Anim</td>
<td>When enabled, the system will use face animations such as sticking your tongue out and/or opening your mouth when performing certain actions. This setting should be disabled if you are using a non-Bento head, the Face 4 option, or the Unrigged versions of the Alternate face cum!</td>
</tr>
<tr>
<td>Alt Face</td>
<td>Select this option if you are using one of the Alternate Face cum attachments!</td>
</tr>
<tr>
<td>Face 1/2/3/4/5</td>
<td>Select the option that best fits your head/face. It is unlikely that any of them will be perfect, find the one that is the closest. Tips for improving the fit are provided later in this manual.</td>
</tr>
<tr>
<td>None</td>
<td>Selecting this option will turn off the face cum completely. It will also disable all face cum options including others ability to cum on or lick your face or in your mouth, as well as your ability to swallow, swap, dribble, etc!</td>
</tr>
<tr>
<td>[Back]</td>
<td>Returns to the Cum Settings menu</td>
</tr>
<tr>
<td>[Exit]</td>
<td>Exits the Appearance and Cum Settings menu. Cum system will be re-activated and all visible cum layers are hidden.</td>
</tr>
</tbody>
</table>
Getting Started

Functions Menu

The Functions Menu provides options related to how your It's NOT Mine! system works.

Changing these settings can have undesirable effects if you do not understand what each of them do!

What the buttons do:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>MaleOnly/Fem Only</td>
<td>Enabling this setting will limit who can cum on you to the gender specified by the setting. INM uses MaleOnly, INAM uses FemOnly.</td>
</tr>
<tr>
<td>Cum Self</td>
<td>Enabling this setting will allow you to cum on yourself when using a supported genital product. Cumming on self is limited to only allow areas that make sense for your gender.</td>
</tr>
<tr>
<td>Drip Down</td>
<td>Enabling this setting will allow cum to drip, or move, from one area of your body to another. The frequency and possibility of the function is randomized.</td>
</tr>
<tr>
<td>Verbose</td>
<td>Enabling this setting will cause your INM system to tell you, and the person cumming on/licking from you, that the action was performed. Note: These messages are private, and only heard by those involved in the action.</td>
</tr>
<tr>
<td>Inseminate</td>
<td>Disabling this setting will remove the ‘In Pussy’ option from the cum menu people receive when cumming on you. Note: Deciduan Couples HUDs and furniture with the INM API can still force cum in pussy, even with this setting turned off!</td>
</tr>
<tr>
<td>SL H2O</td>
<td>Enabling this setting allows you to cleanup in SL® water. Note: Some sims are underwater. Leaving this enabled while in these areas will cause unexpected cleanups!</td>
</tr>
<tr>
<td>Use PA</td>
<td>Enabling this setting, if you use Caeil’s Project Arousal, will prevent cleanup while your arousal level is greater than zero. Note: Project Arousal users with the Heat plugin should disable this setting!</td>
</tr>
<tr>
<td>She-Male</td>
<td>Enable this setting if you are a she-male, or male avatar, using the female It's NOT Mine! system.</td>
</tr>
<tr>
<td>Hard Mode</td>
<td>Enabling this setting prevents cleanup until a certain number of cum layers, or drips, are visible on your It's NOT Mine! system. Refer to the Hard Mode section later in this manual.</td>
</tr>
<tr>
<td>InAssOK</td>
<td>Disabling this setting will remove the ‘In Ass’ button from the cum menu people receive when cumming on you. Note: Furniture with the INM API can still force cum in your ass even with this setting turned off!</td>
</tr>
</tbody>
</table>

Note: Not all options are available in all versions of It’s NOT Mine! It’s NOT ALL Mine!
Getting Started

Privacy Menu

(If you are unsure about how to get to this menu, please refer to the Cum Settings Menu section!)

The Privacy Menu provides options related to the data that your It’s NOT Mine! system collects about you.

What the buttons do:

**Stats**

With this setting enabled, your It’s NOT Mine! system will record the following information and send it to the It’s NOT Mine! database when someone cums on, or licks, you:

- Your avatar UUID. (Avatar key)
- Your avatar username.
- The avatar UUID for the person performing the action. (Avatar key)
- The avatar username for the person performing the action.
- What area of your body the cum was placed on, or removed from.

For information regarding additional data that may be sent to the It’s NOT Mine! database when a cum event occurs, please refer to the LSL Script Portal for LHTTPRequest().

Disabling this setting prevents your It’s NOT Mine! system from sending any information to the It’s NOT Mine! database.

**Delete Data!**

Choosing this option will allow you to delete all of your personal statistics from the It’s NOT Mine! database. Once selecting this option, you will be asked to confirm your decision to delete all of your statistics.

This cannot be undone! Once statistics have been deleted, they cannot be recovered!

[Back] Returns to the Cum Settings menu

[Exit] Exits the Appearance and Cum Settings menu. Cum system will be re-activated and all visible cum layers are hidden.
Getting Started

Adjusting the Cum Drips

Adjusting the It’s NOT Mine! vaginal or It’s NOT ALL Mine! anal drips:

When making adjustments to any of the cum drips, it is often helpful to lock your pose and stop all animations your avatar may be playing. Sit on a pose stand, or enable Firestorm’s Pose Stand feature.

1. Access the General Options menu by following the steps in the General Options Menu section of this document.
2. Choose the ‘Cum Settings’ option in the menu to show all of the cum layers and start one of the cum drips.
3. From within your Inventory, right click on the It’s NOT Mine! attachment you are wearing and choose ‘Edit’ from the menu that appears.
4. Using the gizmo that appears on your avatar, move the entire It’s NOT Mine! system around until you are happy with the position of the cum drip.
   o The Red arrow will move the drip forward and backward
   o The Green arrow will move the drip from side to side
   o The Blue arrow will move the drip up and down

5. When you are satisfied with the position of the drip, exit the edit window.
6. Choose ‘Exit’ in the It’s NOT Mine! settings menu to close the menu and hide everything again.
Getting Started

Adjusting the Cum Drips (Cont.)

Adjusting the It’s NOT Mine! anal drip when using the Premium or Lite body system and corresponding Arms and Legs add-on:

- Simply follow the instructions on the previous page, substituting the Arms & Legs add-on, in place of the body system, in step 3.

Adjusting the It’s NOT Mine! anal drip when using the Female Complete system:

This adjustment should only be made after adjusting the vaginal drip according to the instructions on the previous page!

- Access the General Options menu by following the steps in the General Options Menu section of this document.
- Choose the ‘Cum Settings’ option in the menu to show all of the cum layers and start one of the cum drips.
- Choose the ‘Anal Adjust’ option in the menu.
- Using the buttons provided in the ‘Anal Adjust’ menu, move the drip until you are satisfied with its position. Note: The orientation of movement for the drip prim, as it relates to the buttons listed, assumes that you are looking forward, from behind your avatar.
- When you are happy with the position of the drip, choose the ‘Back’ option from the menu to return to the Cum Settings.
Using the **It’s NOT Mine!** Body Cum System

**Having someone cum on you**

The Ejaculator menu, also known as the cum menu, is the menu your **It’s NOT Mine!** system will give to people around you, when the system detects that they have triggered the cum function in their supported genital product.

This is typically an automatic process; however, you can manually give them the menu as well.

**In order for your **It’s NOT Mine!** system to automatically give someone near you the Cum menu:**

- You need to make sure that you are wearing your **It’s NOT Mine!** system, it is turned on (Active), and that you are not in the Cum Settings Menu.
- The person wishing to cum on you needs to be within 2m of you and be wearing a supported genital product.
- The person wishing to cum on you must then trigger the Cum function in their supported genital product.

*There are specific instances where your **It’s NOT Mine!** system will not automatically give someone the Cum menu, despite these conditions being met!*

Please refer to the Integration section of this manual regarding Deciduan Couples HUDs and Using your **It’s NOT Mine!** system with furniture using the INM API.

Please refer to the Supported Genital Products section of this manual for a comprehensive, albeit far from complete, list of items that will work to trigger the Cum menu of your **It’s NOT Mine!** system.
Using the **It’s NOT Mine!** Body Cum System

Having someone cum on you (Cont.)

In the event that your partner does not have a compatible genital product, or the system has determined that no menu should be provided to them based on what is happening, you can *(most times)* still manually give them a menu to cum on you.

**To Manually give someone the Cum Menu:**

- You need to make sure that you are wearing your **It’s NOT Mine!** system, it is turned on *(Active)*, and that you are not in the Cum Settings Menu.
- The person you wish to give the menu to needs to be within 2m of you.
- Access the **General Options** menu by following the steps in the **General Options Menu** section of this document.
- Choose the 'Give Menu' option in the menu
- Choose the name of the person you would like to give the menu to.
Using the *It’s NOT Mine!* Body Cum System

**Cumming on Yourself**

There may be times when you want to be able to cum on yourself, and this is entirely possible with the *It’s NOT Mine!* systems.

There are some limitations however; particularly with version 3.3 of the female *It’s NOT Mine!* system and version 2.4 of the male *It’s NOT ALL Mine!* system.

With v3.3 *It’s NOT Mine!* and 2.4 *It’s NOT ALL Mine!*, the areas available to you, when cumming on yourself, are limited to the areas that make the most sense.

For example, male users would not be able to cum on or in their own ass or on their back. Most of the other areas remain available for male users to cum on themselves.

Female users will find things are a bit more restrictive with the only available options being their own crotch, hands, arms, front and back of legs, and feet.

*Please refer to the Integration section of this manual regarding the use of your *It’s NOT Mine!* system with furniture using the INM API for further limitations related to cumming on yourself!*

**In order to cum on yourself:**

- You need to make sure that you are wearing your *It’s NOT Mine!* system, it is turned on *(Active)*, and that you are not in the Cum Settings Menu.
- If you have not already done so, make sure that the *Cum Self* option is enabled in the Functions Menu of your *It’s NOT Mine!* system.
- You must be wearing a compatible genital product and trigger the cum function of the genital item.

*Please refer to the Supported Genital Products section of this manual for a comprehensive, albeit far from complete, list of items that will work to trigger the Cum menu of your *It’s NOT Mine!* system.*
Using the It's NOT Mine! Body Cum System

Wiping Cum off of your face

It goes without saying that, at some point, someone is going to shoot a big fat load (or several of them) all over your face and you’ll want to remove that without otherwise cleaning up.

Thankfully, for those using the Complete version of the It's NOT Mine! system, or the Arms & Legs add-on in conjunction with the Premium versions, you have the option to wipe that hot sticky mess off of your face!

In order to Wipe cum off of your face:

- You must be wearing a Complete It's NOT Mine! system, or Premium system with the Arms & Legs Add-on.
- You must have at least one cum layer visible on your face, and you must have at least one of the 4 cum layers for your hands available (not visible).
- Access the General Options menu by following the steps in the General Options Menu section of this document.
- If the above conditions are met, you should see a ‘Wipe Face’ button.
- Select ‘Wipe Face,’ and depending on which hand has a cum layer available, you will raise your hand to your face and wipe one layer of cum off of your face.

With v3.3 It's NOT Mine! and v2.4 It's NOT ALL Mine!, the system will use whichever hand has an available cum layer to wipe the cum from your face, starting with your right hand. Once your right hand is full, it will switch to your left hand.

Previous versions of the system, only allowed you to wipe your face with your right hand.
Using the It's NOT Mine! Body Cum System

Licking cum off of someone

All of the It's NOT Mine! and It's NOT ALL Mine! systems have the ability to interact with each other, in a variety of different ways.

Probably the most erotic of interactions between systems is the ability for one INM/INAM user to lick cum off of another INM/INAM user.

To lick cum off of someone:

- You must be within 2m of the person you want to lick some cum off of.
- Both you and the other person must be wearing one of the It's NOT Mine! systems. (Male or Female system)
- The person you want to lick from must have at least one layer of cum visible on their body, or at least one vaginal or anal drip active.
- You cannot have any cum in your mouth.
- Access the General Options menu by following the steps in the General Options Menu section of this document, then choose the ‘Lick Cum’ option from the menu; or, with the ‘Cum Lick’ gesture activated, on your Windows keyboard press Ctrl+NumPad_Plus(+) 
- The system will tell you that it is looking for someone to lick. This can take a few seconds.
- Once the system is done searching, if any INM/INAM users are nearby, a new menu will appear asking you who you would like to lick.
- Choose the name of the person you want to lick some cum from, or ‘Myself’ if you want to lick yourself.
- Once you have made a selection, another menu will open showing you which areas of the persons body has cum on it.
- Selecting the area to lick will remove one layer of cum from that area on the other persons body, and place it into your mouth.

If you elected to lick yourself, you will see a slightly different lick menu. The areas of your body that you are able to lick are hands and arms, and for females, your chest. Again, note that only the areas that have cum on them will appear in the menu, and only if you are able to lick them!
Using the It's NOT Mine! Body Cum System

What to do with the cum in your mouth

Now that we know waiting for someone to cum in our mouth is not the only way to get cum in there, it becomes a lot more likely that we’ll have some cum in our mouth a bit more frequently and we’ll need to figure out what to do with it.

*Thankfully, we have some options!*

**For the following actions:**

- You need to have cum in your mouth.
- Access the General Options menu by following the steps in the General Options Menu section of this document.

**Swallow:**

- Selecting ‘Swallow’ from the menu will remove the cum from your mouth and tell you that you’ve swallowed the cum in your mouth.
- Alternatively, and rather than accessing the General Options menu, with the ‘Cum Swallow’ gesture activated press Ctrl+Space on your Windows keyboard.

**Spit:**

- Selecting ‘Spit’ from the menu will also remove the cum from your mouth and tell you that it would be a shame to waste it.
- If you are within 2m of another It’s NOT Mine! user when you spit, you will be presented a menu asking where you want to spit the cum on them.

**Dribble:**

- Selecting ‘Dribble’ from the menu will again remove the cum from your mouth, but will also cause a new layer to become visible on your chest.
Using the It’s NOT Mine! Body Cum System

Getting Cleaned up

Now that you’ve gone and got yourself all messy with cum, you’re probably going to want to clean it off at some point.

There are several options available for getting cleaned up; but before we get into that, you need to understand the principle that the It’s NOT Mine! systems were built on.

As the name It’s NOT Mine! should suggest, the cum that is on you is probably not your own. But it had to come from somewhere, and most likely required another person and some effort (Roleplay or some other interaction) to get there.

Likewise, and because It’s NOT Mine! was designed as more of a roleplay tool than it was a fashion item, removing the cum from your body also requires a little bit of effort.

Great! Now that we’ve gotten that out of the way, let’s get cleaned up.
Using the **It’s NOT Mine!** Body Cum System

**Getting Cleaned up**

**Showers:**
- The most convenient way to get cleaned up, typically, will be your own personal **It’s NOT Mine!** shower rezzed in your home.
- In the event that you do not have an established home or some other location where you can rez one of the showers included with your **It’s NOT Mine!** system, showers that will work to clean you up can be found on most sims catering to sexual activities.
- A list of sims, known to have public showers, can be found by clicking [here](#).

**Using the showers to clean up:**

- **Showers v1.4:**
  - Simply sit on the shower and select one of the showering poses from the menu.
  - The shower will tell you, in local chat, when cleanup has started, if it stops, who is being cleaned, and when you are clean.
  - The time required to clean up, and which sitters should be cleaned in each pose can be adjusted by editing the ‘INM Cleanup Config’ notecard in the contents of the shower. Instructions for adjusting the cleanup configuration are outlined in this notecard.

- **Showers v1.3 and prior:**
  - Again, sit on the shower.
  - Wait until the shower tells you that you are clean. Default time is 4 minutes.
  - If you are the owner of the shower, you can adjust the time required to clean up via the ‘Clean Time’ menu of the shower.

*When making an adjustment to the clean time, cleanup will stop. You must stand up and sit on the shower again for the change to take effect and cleanup to restart.*
Using the It’s NOT Mine! Body Cum System

Getting Cleaned up

Jump in a lake (Seriously!):

- You can also clean up in Second Life® water (aka the ocean).
- Submerge your avatar in the water. **Prim water will NOT work!!**
- When cleaning up in Second Life® water, only the areas of your avatar which have cum on them, and are under water, will be cleaned. **Example: If you have cum on your crotch and face, but your head is not under water, only your crotch will be cleaned.**
- The time required to cleanup in Second Life® water is approximately 100 seconds.

If you do not want to be able to use SL® water for cleanup, you have, or visit places which have buildings or areas that are under the water; you can turn off the ‘SL H2O’ setting in your It’s NOT Mine! system to prevent cleaning you while in SL® water.
Using the **It’s NOT Mine!** Body Cum System

**Your statistics**

The **Premium** and **Complete** versions of the **It’s NOT Mine!** systems are capable of monitoring, and providing you with, statistics regarding your use of the system.

These statistics are considered personal and private. Only you are able to view your statistics, unless you choose to share them with someone else.

**Your statistics can be viewed at any time from within your **It’s NOT Mine!** system.**

---

**To view your personal statistics:**

- Access the **General Options** menu by following the steps in the **General Options Menu** section of this document.

- Choose the ‘My Stats’ option from the menu.
  
  **(If there is no ‘My Stats’ button in the menu, you have either disabled ‘Stat Tracking’ in the Privacy options of your **It’s NOT Mine!** system, or are using the Lite version of the system.)**

- A new menu will appear, which displays basic statistics information.

- Clicking on the ‘Go to page’ button from within this menu will take you to a webpage which will provide you with a more detailed view of your statistics.

---

**The link for your Statistics webpage is only valid for 5 minutes. Therefore, it is safe to share the link with others if you wish to share your stats with them.**

**Once the link expires, the page can no longer be opened and, attempting to refresh the page will, prevent any further viewing of your statistics.**
Using the It’s NOT Mine! Body Cum System

Your statistics

The statistics webpage provides a more detailed breakdown of your statistics. On the right side of the page, you can see how many times each location has been cummed on, the number of times someone has licked you, and totals for the number of times cummed on or in.

At the top left of the page, you will see 3 tabs. The image below is displaying the ‘My Stats’ tab.

You can choose the ‘My Donors’ and ‘My Donations’ tabs to see a list of avatars who have donated cum to you (My Donors), or that you have donated cum to (My Donations). For reasons of privacy, these tabs will not be displayed in this manual.
Using the *It's NOT Mine!* Body Cum System

**Hard Mode**

*Hard Mode* is a function of the *It’s NOT Mine!* system that was added, more or less, as a game of humiliation. Enabling the *Hard Mode* option in the *Functions menu* of your *It’s NOT Mine!* system will require you to display a substantial amount of cum on your body before you will be allowed to clean up.

The amount of cum that you must have displayed on your body before you can clean up will vary, and can change depending on your actions.

**Important things to know about Hard Mode:**

- **Hard Mode** will set a requirement for the number of cum layers that must be visible on your body before you will be allowed to clean up. Your *It’s NOT Mine!* system will tell you what this requirement is, in local chat.

- Attempting to clean up before the required number of layers are visible will cause the *It’s NOT Mine!* system to add additional layers to the requirement.

- Third party items which have the ability to disable cleanup will cause your *It’s NOT Mine!* system to add additional layers to the requirement if *Hard Mode* is enabled.

- The maximum requirement for the Premium system when used alone is 26 layers.

- The maximum requirement for Complete, or Premium with the Arms & Legs add-on is 50.

- Cumming on yourself is not allowed when you are using *Hard Mode*.

- Because you need to access the *Cum Settings* menu to do so, *Hard mode* can only be enabled or disabled while you are clean and the system is not in *SystemLock*. 
Compatibility and Integration

Deciduan Couples HUDs

The It's NOT Mine! systems are capable of integrating with a number of third party items available in SL®.

One such item is the Deciduan Couples HUD’s.

It’s NOT Mine! can detect when you are using a Deciduan Couples HUD, if and when you are coupled to another person through your Deciduan Couples HUD, and when an orgasm occurs in your, or your partners, Deciduan Couples HUD.

It’s NOT Mine! will do all of this automatically. There is nothing that you need to do to make your It’s NOT Mine! system and Deciduan Couples HUD work together.

Deciduan Couples HUDs are a third-party item which It’s NOT Mine! has no formal affiliation with. There is no requirement to use them with the It’s NOT Mine! system.

How It’s NOT Mine! works with Deciduan:

- It’s NOT Mine! will remove the ‘In Pussy’ button from the Cum menu if you are using a Deciduan Couples HUD and it is coupled to another users Deciduan HUD.
- It’s NOT Mine! will prevent the automatic and manual delivery of the Cum Menu to any person that is coupled to your Deciduan Couples HUD. It would be silly to let them cum anywhere on your body while their dick is inside you!
- If you are a female, It’s NOT Mine! will automatically start one of the four insemination drips when your coupled partner orgasms in their Deciduan Couples HUD, provided they do not have a condom equipped. Disabling the Insemination option in the Functions menu of your system will not prevent this!
- If you are a male, It’s NOT ALL Mine! will automatically place one layer of cum on your crotch when your coupled partner orgasms in their Deciduan Couples HUD. Additionally, if you have Cum Self enabled in your It’s NOT ALL Mine! system, one layer of cum will be applied to your crotch when you orgasm in your Deciduan Couples HUD.
- It’s NOT Mine! will not prevent another person, who you are not coupled to, from cumming on you while you are coupled to someone through your Deciduan Couples HUD. It will however, prevent this additional person from being able to cum in your pussy.

What It’s NOT Mine! will not do with Deciduan:

- It’s NOT Mine! will not remove the need for a male Deciduan Couples HUD to introduce the potential for pregnancy in the female Deciduan Couples HUD.
- It’s NOT Mine! will not alter settings, or in any way affect or interfere with the operation of your, or another person’s, Deciduan Couples HUD.
Compatibility and Integration

PsiCorp Fertility System

When used in conjunction with an It’s NOT Mine! system, the PsiCorp Fertility System works in a similar fashion as the Deciduan Couples HUD.

The PsiCorp Fertility system is a third-party item which It’s NOT Mine! has no formal affiliation with. There is no requirement to use it with the It’s NOT Mine! system.

How It’s NOT Mine! works with the PsiCorp Fertility system:

- It’s NOT Mine! will automatically start one of the four insemination drips when your partner triggers the Cum Inside or Impregnate options in their PsiCorp Fertility system. Disabling the Insemination option in the Functions menu of your system will not prevent this!
- It’s NOT Mine! will not start one of the insemination drips if your partner has a condom equipped in their PsiCorp system when the Cum inside option is selected through the PsiCorp Fertility system.

What It’s NOT Mine! will not do with the PsiCorp Fertility System:

- It’s NOT Mine! will not remove the need for a male PsiCorp Fertility system user to introduce the potential for pregnancy in the female PsiCorp Fertility system.
- It’s NOT Mine! will not alter the settings of, or in any way affect or interfere with the operation of your, or another person’s, PsiCorp Fertility system.
- There is no integration between the male It’s NOT ALL Mine! system and the PsiCorp Fertility System.
Compatibility and Integration

Project Arousal

It’s NOT Mine! has the ability to work with another popular item in SL® as well, Cael’s Project Arousal.

Project Arousal is a third-party item which It’s NOT Mine! has no formal affiliation with. There is no requirement to use it with the It’s NOT Mine! system.

In order for Project Arousal to work with It’s NOT Mine!, you’ll need to install a plugin into your Project Arousal system.

Installing the plugin:

• Ensure that you are wearing your Project Arousal system and that you are not prevented from detaching it.
• Find the ‘It’s NOT Mine! Plugin applier for PA’ in your inventory (It will be in your It’s NOT Mine! folder) and attach it.
• Wait for the applier to tell you that the plugin has been successfully installed and that it is safe to detach the applier.
• Detach the applier.

If you have previously installed the It’s NOT Mine! plugin into your Project Arousal system, you do not need to do it again unless there is an update to the plugin!

How It’s NOT Mine! interacts with Project Arousal:

• It’s NOT Mine! will increase the arousal level in your Project Arousal system every time someone cums on or in you, or someone licks cum off of you.
• It’s NOT Mine! will prevent you from cleaning up in a shower, SL® water, or any item which may be using the Alternate Cleanup script while your arousal level is greater than zero unless the ‘Use PA’ option is turned off in the Functions menu of your It’s NOT Mine! system.
• Project Arousal users, who also have the ‘Heat’ plugin for Project Arousal installed, should turn off the ‘Use PA’ option in the Functions menu of their It’s NOT Mine! system.

It’s NOT Mine! will not detect orgasms from your Project Arousal system!
Compatibility and Integration

Xcite! Brand Genitals

Xcite! brand genitals work with It’s NOT Mine! in a similar fashion as Project Arousal, however no plugin is required.

Xcite! Brand genitals are a third-party item which It’s NOT Mine! has no formal affiliation with. There is no requirement to use them with the It’s NOT Mine! system.

In addition to the It’s NOT Mine! system’s ability to detect orgasms from Xcite! Brand genitals; it can, and will, monitor and increase the arousal level of your Xcite! Brand genitals (if used) when someone cums on or in you, or someone licks cum off of you.

The It’s NOT Mine! systems are not capable of detecting an orgasm, from any Xcite! Brand genital item, when the user has selected the ‘Cum’ button in their Xcite! HUD. Orgasms from Xcite! Brand genitals can only be detected when orgasms are triggered using the Arousal meter of the genital HUD.

Unlike when it is used with Project Arousal, It’s NOT Mine! will not prevent you from cleaning up if the arousal level of your Xcite! Brand genital item is greater than zero.
Developer Tools

It’s NOT Mine! API’s

The It’s NOT Mine! API’s were developed as a way for creators, and the owners of public sims who are creating items for use on these sims, to integrate their creations with the It’s NOT Mine! system.

To apply for the It’s NOT Mine! API’s, please complete the online application form.

It’s NOT Mine! API for Avsitter2:

The It’s NOT Mine! API for Avsitter2 provides an immersive experience for It’s NOT Mine! users, while seated on a furniture item equipped with the API, by reducing the overall need for button clicking in menus. Cum layers are added and removed for cum and lick events based on the pose, without the need for an additional menu from the It’s NOT Mine! system.

Basically, if the furniture item is properly configured, cum will automatically be applied to, or removed from, the parts of your body that make the most sense for the pose being used when an orgasm is detected. This way, you won’t get cum on your ass in a blowjob pose! (Unless of course that’s a MFM pose and someone else is behind you!)

All cocks currently supported by It’s NOT Mine!, and any added in the future, will work with furniture items equipped with the API.

It’s NOT Mine! Cleanup API for Avsitter2:

The It’s NOT Mine! Cleanup API for Avsitter2 allows content creators in SL® to build and sell items which can be used for cleaning up It’s NOT Mine! systems.

The cleanup API can be configured so that each pose, that is listed as a cleanup pose, can have a different amount of time required to clean the It’s NOT Mine! system.

Additionally, each pose can be configured to clean either a single person seated on the furniture item, or all of the sitters on the item.

It’s NOT Mine! General Purpose API:

The It’s NOT Mine! General Purpose API is a powerful tool that gives creators the means to integrate items other than furniture with the It’s NOT Mine! system.

Due to the nature of this API, and because it can control virtually every aspect of a user’s It’s NOT Mine! system, much more scrutiny is given to the approval process when applying for this API.

- **The Gentleman’s Club**
## Optional Chat Commands

The It’s NOT Mine! systems allow for the use of chat commands in place of many of the menu options for those who prefer them.

Your It’s NOT Mine! system will only respond to a valid chat command issued by you, and the command must be issued on channel 33.

To chat on a channel other than the public channel, type a forward slash (/) followed by the channel number, then the message you wish to chat on that channel. Example “/33 menu”

<table>
<thead>
<tr>
<th>Command</th>
<th>Description</th>
</tr>

</tr>
</tbody>
</table>
Appendix D

Adjusting the It’s NOT Mine! system for your head

Adjusting to fit Bento rigged mesh heads:

- Access the Faces menu
- If you do not want your It’s NOT Mine! system to make you stick your tongue out when licking or swallowing, turn off the ‘Face Anim’ option.
- Choose the face option that best fits your face with your current shape. (Face 1, 2, 3, or 5). Avoid using Face 4 with bento heads!
- You can choose the ‘None’ option if you do not want to get cum on your face. This will however, prevent you from licking, swallowing, spitting, dribbling, etc.
- Choose the ‘Alt Face’ option if you are using one of the Alternate Face Cum attachments. It should not be used otherwise!

If further adjustments are necessary to achieve a satisfactory fit, you may want to adjust your avatar shape some.

- In your viewer, edit your shape settings
- Using the sliders in the Head, Eyes, Nose, Mouth, and Chin tabs, make small changes to your shape and watch how the cum attachment changes
- The cum attachment will change at a different rate than your face will
- There are a lot of sliders to choose from! Take your time and make small changes to avoid drastic changes to your appearance!
- Most of the time, an acceptable fit can be achieved without significantly affecting the shape of your face!

To keep the cum attachment visible while you are making adjustments to your shape, simply press the blank button in the INM Faces Menu once every couple of minutes!
Appendix D

Adjusting the It’s NOT Mine! system for your head

Adjusting to fit Non-Bento mesh heads, or if you are not using a mesh head:

- Access the Faces menu
- Disable the ‘Face Anim’ option.
- Choose the face option that best fits your face with your current shape. (Face 1, 2, 3, 4, or 5).
- You can choose the ‘None’ option if you do not want to get cum on your face. This will however, prevent you from licking, swallowing, spitting, dribbling, etc.
- Choose the ‘Alt Face’ option if you are using one of the Alternate Face Cum attachments. It should not be used otherwise!
- Adjust the cum attachment to fit your face:
  - In your viewer, edit your shape settings
  - Using the sliders in the Head, Eyes, Nose, Mouth, and Chin tabs, make small changes to your shape and watch how the cum attachment changes.
  - Most of these sliders will not affect the shape of your face!
  - There are a lot of sliders to choose from! Take your time and make small changes to avoid drastic changes to your appearance!

To keep the cum attachment visible while you are making adjustments to your shape, simply press the blank button in the INM Faces Menu once every couple of minutes!

If you are unable to achieve an acceptable fit:

If after following the instructions for fitting the face component of the It’s NOT Mine! to your head, you are still not satisfied with the fitment of the system you can turn off the face cum completely by choosing the ‘None’ option in the menu.

An Alternate face cum attachment is also available now!

The Alternate face cum is an additional attachment that you will need to wear on your avatar. There are both rigged and unrigged versions of the face cum included. The unrigged options can be moved and resized to allow you to fit the attachment to your face.

Cleanup Disabled
Appendix D

SystemLock
## Troubleshooting and FAQ’s

This should be the first place you check if you are having troubles

<table>
<thead>
<tr>
<th>Symptom/Trouble</th>
<th>Remedy</th>
</tr>
</thead>
<tbody>
<tr>
<td>I cannot remove my It’s NOT Mine! system</td>
<td>Make sure that you are clean, the system’s ‘Detachable’ option is enabled, and that the system is not in SystemLock by using the optional IN/M User HUD and choosing ‘Debug’ from the menu. You should not disable RLV in your viewer to resolve this issue, because it will still be there the next time you attach your It’s NOT Mine! system.</td>
</tr>
<tr>
<td>I have been in the shower forever and cannot get clean!</td>
<td>This is usually caused when you have enabled Hard Mode in the It’s NOT Mine! system, but have not met the minimum cum requirements. Cleanup could also be disabled by another attachment you are wearing. Get the required amount of cum, or satisfy the object that has disabled cleanup.</td>
</tr>
<tr>
<td>This thing is spamming me with a wall of text every few seconds!</td>
<td>This is generally due to a viewer setting; particularly if you have RLV enabled in your viewer. Go to the RLV menu at the top of your screen. Choose the ‘Debug’ option from the menu. Uncheck the ‘Show debug messages’ option.</td>
</tr>
<tr>
<td>Can I reset or delete my stats?</td>
<td>Using the Privacy menu of your It’s NOT Mine! system, you can reset and delete your stats. This is an all or nothing solution however. Individual donors cannot be removed without deleting all of your stats!</td>
</tr>
<tr>
<td>Can I remove a single donor from my stats?</td>
<td>No. Your stats can be reset or deleted, but it is all or nothing.</td>
</tr>
<tr>
<td>Why can’t people cum in my pussy?</td>
<td>If the ‘In Pussy’ option is not present in the Cum menu, you have either turned on the She-Male option, or turned off the Insemination option in the Functions menu, or you are coupled to someone else using a Deciduan Couples HUD.</td>
</tr>
<tr>
<td>I have some other problem that is not listed here</td>
<td>If you are having and issue not mentioned here, you can first ask for help in TC’s Official Support Group, the official group for It’s NOT Mine! and other products sold by TrinaCarlsson. If you still have not found an answer to your question or trouble, IM Trina for help.</td>

Release Notes

It’s NOT Mine! v3.4 / It’s NOT ALL Mine! v2.5

- Bug fix related to some VSX and ZAF brand cocks not working
- Added option to Functions menu to allow use of old breast lick animation

It’s NOT Mine! v3.3 / It’s NOT ALL Mine! v2.4

- Reworked body meshes and cum menus to break up target areas into more specific locations.
- Added Feet Cum (Arms/Legs add-on or Complete version required) for each body’s HIGH feet only.
- Added Neck, Back, Stomach, Front/Back of Legs, Hands target areas
- Fixed a bug that would instantly re-clean new cum after cleanup in SL water if user has not left water yet.
- Made several improvements to the Cum Settings Menus
- Fixed bug with vaginal drips not stopping on their own after specified amount of time
- Added Cum Transfer effect when 2 It’s NOT Mine! users bump into one another.
- Added ability to lick hands separately from arms.
- Added hand lick animations
- New animation for licking breasts
- Added chat commands for "wipe face" and "dribble"
- UV and materials improvements on textures
- Wiping face will use right hand until both RH layers are filled, then will switch to Left hand.
- Improvements to drip down effect, drip down affects more areas.
- Changed vaginal drip duration to randomize between 1 and 6.4hrs depending on # of active drips.
- Vaginal drip duration, before stopping on their own, can be extended by cumming ’In Pussy’ more than 4 times. Each additional time ’In Pussy’ is used, the drip time is extended
- Name selection menus, for Cum and Lick Menus, use Display names rather than user names.
- Cum and Lick target area menus now show Display name for system owner near the top of the menu.
- Sub menus, with Back button, added to Cum and Lick target area menus.
- Suppressed spamming 'so and so just came on your....' messages from system when using furniture with INM API and configured to mess several spots at once.
- User Stats are now displayed in the 'Go to Page' dialog box.
- Added support for ZAF Feline Canine Animesh cock.
- Added support for a number of lesser known cocks.
- Meshbody Legacy Perky size added.
- Maitreya Lara Petite size added.
Release Notes

It's NOT Mine! v3.2 / It's NOT ALL Mine! v2.3:

- Added Support for Depraved Freaks cocks
- Added support for Rut Joystick cock
- Added support for ZAF HybridKitty cock (Previously only ZAF Premium Hybrid bits were working)
- Added Hard Mode. Hard mode requires a minimum level of cum to be visible before cleanup is allowed. Attempting to cleanup before minimum is met, minimum cum requirement is increased!
- Added a verbose message for your partner, advising them they came on you and on what area (Turns on/off with Verbose setting)
- Added the ability to wipe cum off your face if your right hand is has less than 8 layers of cum visible
- Added the ability to lick your own arms and for female version, breasts
- Added Dribble function to move cum from your mouth to your chest
- Added cum can migrate from arms to face, chest, crotch, or ass if cleanup does not occur in a timely manner.
- Added If Project Arousal is used and user is messy, arousal will increase if people are around. Amount of increase depends on # of people nearby.
- Added option to disable cum drip down effect
- Added 5th face option which is a bento version of the TMP face for female and Signature Geralt for male
- Added 8 pussy/crotch, 8 chest, and 3 ass layers for female and 8 chest, 3 crotch, and 8 ass layers for male
- Added Status button to general options menu when messy to report current cum levels
- Added Male only option for female version
- Added the ability to disable stat tracking within your INM system
- Added the ability to delete all of your statistics.
- Added API commands to stop vaginal and anal drips, such as when a butt plug is used or the user dresses.
- While plugged, those areas will NOT be able to be cleaned and cannot be cummed in or licked from.
- Added API command to prevent cleanup entirely. If hard mode is active, disabling cleanup also adds to minimum requirement!
- Added eBody Curvy body
- Added Signature Geralt body
- Categorized Settings Menu into submenus for Appearance, Faces, Functions, and Privacy options
- Code addition for improved operation of, and to accommodate the She-male option in, Get it off! towels 1.3 (Get it off! update forthcoming)
- Fixed a bug that allowed spitting up to 10m
- Fixed script in DEMO mode checking for product update.
- Vaginal and anal drips will no longer drip indefinitely. Each drip will last for a random amount of time between 2 and 5 hours if not cleaned up.
- Improved randomization and reduced frequency of Drip down effect
- Statistics webpage will now update donor keys with the donors name. Name will be displayed if available.
Release Notes

It's NOT Mine! v3.1:

- Fixed CumSelf option not working with Xcite...again.
- Fixed a bug that disabled Spit functions when Deciduan Couples HUDs are used and coupled
  - Male requires version 2.0 and higher It’s NOT ALL Mine! system
  - This fix breaks backwards compatibility for spit functions!
- Fixed a bug that caused certain VSX brand cocks to stop working with INM
- Added support for [Marie Avatars] cocks.
- Added Slink Hourglass Petite and Physique Petite body options
- She-Male option added to remove possibility of vaginal insemination for girls with boy parts
- Redundancy check for RLV added to minimize RLV detection issues.
- Lowered minimum cum delay setting to 3 seconds. Default remains at 5 seconds.
- Removed messages concerning integrated items detection and lost communication
- Cum drip can now move from arms to face.
Release Notes

**It’s NOT Mine! v3.0:**

- UV and smoothing fixes to mesh components for all bodies.
- Face components redone due to the originally uploaded files lost in a hard drive failure. Fitment will have changed!
- Mouth cum changed so it is not so uniform in length of the chin drips.
- Altamura Sofia body added
- Cumdelay chat command added to limit consecutive cum events from the same donor
- Color chat command added to allow changing cum color
- Spit chat command added
- GiveMenu chat command added
- Fixed verbose messages
- System reports when an integrated item is detected or communication with the item has been lost
- Code added to prevent system scripts from being stopped when entering a no script sim.
- Code added for upcoming Tantra support
- Code added to support color changes and extra cum layers in Arms & Legs (pending Arms&Legs update)
- Support for ZAF cocks added
- Added ‘Use PA’ button to Cum Settings menu to disable cleanup prevention when Project Arousal’s arousal level is greater than 0. Useful for Project Arousal users with the Heat plugin.
- Removed Project Arousal dev script from It’s NOT Mine! system.
- Created Project Arousal plugin with PA installer for continued Project Arousal support
- Changed “Owner Menu” button in General Options menu to “Cum Settings” to avoid misconception that INM system has an ‘owners system’ built into it.
- Reorganized General Options menu buttons
- Added “[Private Message]” to the start of all private messages sent by INM system.
- Changed how Spit function works while seated on furniture with the AVsitter API for INM to resolve a bug in furniture with API version 0.106 and older, which have not been updated.
- Cum drips randomized in duration of drip and interval between drips
- Cum drip down effect onto legs is now affected by cum in and on ass
- Cum drip down effect added for arms and is affected by cum on chest
- Secure, time limited access, webpage added for viewing the details of your personal stats.
Release Notes

It’s NOT Mine! v2.10:

- Several improvements related to Avsitter API for It’s NOT Mine!
- Greatly improved detection of orgasms in Xcite brand genitals
- Fixed Xcite brand genitals owned by cum system owner not being detected
- Fixed Powerhaus cocks not being detected all the time
- Hugsies cock 3.6 added to detection list (part of Powerhaus fix)
- Midnight Lotus female genitals added to detection list
- The Coochi female genitals added to detection list (Plugin Required)
- Sensations female genitals added to detection list (Use Sensations cock plugin!)
- Drip down effect added. (Pseudo random and happens over time)
- Fixed appearance and texture animation changes only affecting currently selected face option
- Fixed Ejaculator menu appearing for system owner if ‘Cum Self’ is active when Deciduan Couples huds are used and coupled, and a supported vagina is used.

It’s NOT Mine! v2.9:

- Bug fixes related to AVsitter API
- Additional API commands added to better support cum functions through API

It’s NOT Mine! v2.8:

- Fixed incorrect texture animation on face components
Release Notes

It's NOT Mine! v2.7:

- Further refinement of cum textures
- Drip texture changed
- Fixed a bug that would allow someone to cum on you while owners menu active
- Fixed a bug that would put cum in your mouth if licking an area that did not have cum on it.
- Fixed some rigging issues with SL Face component
- Spit function added. (Currently accessible through General Options Menu only)
- Menu improvement for licking. Buttons are only shown for an area if there is cum on it.
- Showers updated to better accommodate male version of the system
- Showers no longer require you to shower alone to clean up.
- Added 2 more cum layers to the butt that go up the back
- Added 1 more cum layer to chest that goes onto tummy

It's NOT Mine! v2.6:

- Sacrificed to testing

It's NOT Mine! v2.5:

- Textures changed
- Texture animation slowed down
- Stats Added (New button in General Options menu)
- User Manual menu button relocated to General Options menu
- API functions added for integration with Avsitter API
- Additional security protocol added to protect against incoming commands from unap-proved items
- Royal cocks no longer require a plugin to work with the system
- SKNK Bento cock now supported
- Added support for VSX cocks (Violet Studios)
- Fixed a bug that would hide face cum, if present, when logging in
- Massive script optimizations resulting in fewer scripts
- Cum layers for each area now appear in random order
- Changed button names in Ejaculator menu from ‘Cum in ass’ to ‘In Ass’ and ‘Inseminate’ to ‘In Pussy’
- Added verbose option to Owner menu for cum events triggered by Ejaculator and Lick menus
- Fixed a misspelling in the cum appearance menu
Release Notes

It’s NOT Mine! v2.3 & v2.4:

- Versions not released

It’s NOT Mine! v2.2:

- Fixed a bug that would hide all visible cum layers if face option was set to 'None'
- Fixed a bug that would cause Sensations cock users to get 2 menus if they used the cock action hud and had the plugin installed.
- Added support for iQYN, Powerhaus, Royal (with plugin), and ER Ares 1.1.1 cocks
- Revised code related to event handling for upcoming and future accessories
- Changed the cum drip so it does not appear when Aeros cock uses Pre-cum effect with Deciduan HUD

It’s NOT Mine! v2.1:

- Fixed a bug that could, in a well timed series of events, prevent the user from cleaning up and could sometimes hide the visible cum, leading a user to believe they were clean.

It’s NOT Mine! v2.0:

- Added ability to swallow the cum in your mouth.
- Added the ability to swap cum in mouth and lick cum off of another It’s NOT Mine! user.
- Added PsiCorp CCS/Fertility HUD compatibility.
- Added the ability to cum on yourself if you have the appropriate male parts.
- Added the ability to prevent detachment of the system while you are clean.
- Added version number to cum attachment name for easier identification.
- Included gestures for Swallowing, Cum Licking, and accessing the Owner options.
- Included Sensations and PsiCorp cock plugins you can give to male partners. (Full compatibility with Sensations and PsiCorp cocks can only be accomplished if the cock owner installs the plugin into their cock!!)
Release Notes

It’s NOT Mine! v1.10:

- Improved Xcite orgasm detection as long as orgasm occurs AFTER the cock owner has been within 2m of cum owner for at least 10s.
- Added Deciduan condom detection. No insemination drip starts if Deciduan Couples HUDs are used and the male orgasms inside you while wearing a condom.
- Option to manually give Ejaculator menu now uses User names instead of Display names.
- Fixes a script error that can occur with special characters.
- Reduced clean up time in SL water to around 90s.
- Update script was missing from Tonic Curvy version.
- Reorganized Ejaculator menu to facilitate upcoming add-on.
- Added cum current/max levels for each area in Ejaculator menu.
- Removed 'Spray It' option from Ejaculator menu.
- Cum will now gradually disappear when showering or when cleaning up in SL water. (ONLY works with new shower and SL water!)
- Added Configuration menu to the showers which allows some adjustment of the cleanup timer.
- Found the source of, and removed, public channel listeners from particle scripts in the showers.
- Fixed the shower fog effect.
- Condensed shower scripts, resulting in the removal of 3 scripts from the showers.

It’s NOT Mine! v1.9:

- Fixed a nasty bug with SL water detection that would randomly clean some users who were not under water.
- Rearrangement of Owners Menu, added SL Water toggle on/off ability
- Removed delay when trying to manually give ejaculator menu to someone nearby.
- Give menu function now gives the owner a menu with names, rather than simply giving the ejaculator menu to the closest person found.
- Fix for some Sensations brand cocks not being detected.
- Cleaned up and optimized scripts code reducing potential for script crash.
- Possible fix for Xcite proximity events giving Ejaculator menu to nearby avatars when they have not cum.
- Added Tonic Curvy and Fine Beauty bodies.
Release Notes

It’s NOT Mine! v1.8:

- Added chat command '/33 mymenu' to open owners menu
- Added options to adjust the amount of shine when layers are visible
- Fix: Missing 'Back' button in faces menu
- Fix: Pop up about instructions no longer appears every time worn
- Several minor bug fixes

It’s NOT Mine! v1.7:

- Added SL water detection and cleanup for parts of you that are under SL water
- Reduced arousal increase amounts for Project Arousal
- Fixed a bug which caused some users to report the cum failing to fully hide after cleanup when in a laggy sim.
- Added detection of Sensations versions 3 and 6, and Midnight Lotus cocks
- Added a chat command to give the ejaculator menu to the avatar nearest to you if they do not use a compatible cock. It can take up to 10 seconds for that person to receive the menu. The command is '/33 menu' (case sensitive) in local chat, without quotes.

It’s NOT Mine! v1.6:

- Initial release
